

## HIGHLAND TOWER CONDOMINIUM LANDSCAPING

Sullivan Land Services (SLS) was selected by GT Leach Builders to perform the landscape and irrigation for the Highland Tower Condominium project located at 2207 Bancroft Houston, TX. As part of the project, SLS lifted 10 - 6,000 lb Medjool Date Palms onto the 5th Level amenity deck of this high-rise condo. Almost 500 CY of landscape material was also lifted onto the 70 feet high outdoor common area, primarily consisting of an engineered lightweight soil mix that allows for rapid drainage off of the top the parking garage for this 90 unit condo. In addition, SLS installed a 6 cup, 1,200 sf (Jack Nicklaus Design) putting green for the residents use. This project demonstrates SLS's ability to work within tight conditions and challenging parameters to deliver the owner and GC a quality product suitable for the high end condo project.

### PROJECT SUMMARY

- 10 - 6,000 lb Medjool Date Palms lifted onto 70 feet high area
- 500 CY material lifted
- 6 cup, 1,200 sf (Jack Nicklaus Design) putting green installed
