

HAITI PUBLIC COMMUNITY SITE CONSTRUCTION - NAVFAC PROJECT

In February 2011 Sullivan Land Services, LTD was awarded two Design Build Construction contracts by Naval Facilities Engineering Command South East (NAVFAC) for Community Sites in Jeremie - Abricot and Jeremie – Chateau, Haiti. Projects include Schools, Medical Clinics, Community Centers, Latrines, Emergency Operations Center and Disaster Relief Warehouse.

SLS was chosen under “Best Value” guidelines due to our proven experience in Haiti and our ability to manage the many logistical, political, and financial challenges associated with Post Disaster Haiti construction.

PROJECT SUMMARY

- Site Development to include design and installation of electrical, water, sewer, and roadway infrastructure.
- Building Construction to include design and construction of foundation, pre engineered metal structures, HVAC, Electrical Service, Plumbing and Interior Finishes.

The above are highlights of recent projects. A more comprehensive list of company projects is available upon request. References for the aforementioned projects, as well as general company, financial, insurance and bonding references are also available upon request.
